

Workgroup 2 Recommendations for How to Mitigate Impacts to Hydropower Due to Water Storage Reallocations Under Corps Policy -- Tom Gebhard

- 1. Determine energy impacts based upon the withdrawals in the water supply contract. (10)**
- 2. Recognize hydropower contracts as a permanent right like water supply contracts. (10)**

US Army
Corps of Engineers

Workgroup 2

Recommendations Continued

- 3. Assign values to lost energy and capacity that reflect the marketing of the power resources prior to reallocation. (9)**
- 4. Include stakeholders early and often throughout the reallocation process in a more collaborative way. (8)**

of Engineers

Workgroup 2

Recommendations Continued

5. Allow PMAs to determine the impacts to hydropower and the compensation for the lost resource.

(8)

6. Consider and properly evaluate reallocation from all active storage pools other than hydropower. (7)
