

CHUM QUESTIONS FOR SALMON MANAGERS

- 1) What were the impacts of chum ops on Vernita Bar and visa versa?
- 2) Did last year's staggering of flows help or hurt the chum spawning?
- 3) What effect did reverse load seem to have on the Ives Island chum?
- 4) Compare and contrast the Ives & St. Clouds effects
- 5) Provide additional flow data for Hamilton Creek
- 6) What advice can be given after analyzing the data related to redd distribution and flow over the past number of years?
- 7) What additional restrictions of spawners at Hardy/Hamilton need to be made (or avoided) in the upcoming season?
