

FPP Change Form

9/14/07

Change Request Number: 09AppG001

Date: 8/06/2008

Proposed by: BON Fisheries

Location of Change- Appendix G BON AFF trapping protocols 4.

Trapping will not occur when fish ladder water temperatures meet or exceed 70°F as measured in the brail pool. The only exception is for US v Oregon requirements.

Proposed Change:

Allow lamprey trapping when water temps are between 70°F and 72°F

Salmonid trapping will not occur when fish ladder water temperatures meet or exceed 70°F as measured in the brail pool. The only exception is for US v Oregon requirements and for nighttime lamprey trapping.

Reason for Change:

According to lamprey researchers, handling lamprey at the elevated temperatures does not seem to stress them as it does salmonids.

Comments from others:

NOAA and USFWS are OK with the trapping.

CRITFC is ok but would like to see trapping reduced to four nights a week.

IDFG is mulled over the issue and decided it was OK.

ODFW is unavailable.

WDFW was left a voice message but no return call yet.

Record of Final Action: approved via email.
