

**OFFICIAL COORDINATION REQUEST FOR
NON-ROUTINE OPERATIONS AND MAINTENANCE**

COORDINATION TITLE - 15BON07 115KV line voltage support

COORDINATION DATE - 21 May 2015

PROJECT - Bonneville Lock and Dam

RESPONSE DATE - 29 May 2015

Description of the problem - BPA transmission outages require at least 40 MW on the 115KV line for 10 hours on 1 June 2015.

Type of outage required - No outage but will require a split flow operation.

Impact on facility operation - The Project will need to split unit operation between PH2 and PH1. This deviates from the FPP guidelines for powerhouse priority during this time of year. Unit 1 is the preferred unit for PH1.

Dates of impacts/repairs - 1 June 2015.

Length of time for repairs – 10 hours.

Expected impacts on fish passage – minimal impacts due to the short term nature of the operation.

Comments from agencies –

CRITFC (telephone call) – Lorz is ok with the one unit operation at PH1 on 1 June.

Subject: [EXTERNAL] Re: FPOM: Official Coordination 15BON

Tammy, We are ok with the short (10 hr) single unit (unit 1) operation at PH1 for this work. Thanks, Gary

Final results – this action moved forward as coordinated.

Please email or call with questions or concerns.

Thank you,

Scott Bettin
