Bonneville Project

July 31, 2013

Theresa Liedtke  
Research Fishery Biologist, U.S. Geological Survey,  
Biological Resources Division  
5501A Cook-Underwood Road  
Cook, Washington 98605

Dear Ms. Liedtke:

This is in response to your July 24, 2013 letter requesting approval for access to Bonneville Dam (BON) to monitor radio-tagged adult salmon using mobile and fixed telemetry. It is understood that this research is part of the Washington Department of Fish and Wildlife's Alternative Gear Study. Your proposal states that a key component of this research project is to monitor fish at BON to determine the fate of radio-tagged fish collected and tagged downstream of BON.

With respect to the work outlined above, your request is generally approved, provided you are able to obtain all necessary ESA and state permits. **No work may begin until permits, or an explanation as to why permits are not required, are on file with the Mr. Andy Traylor and Ms. Tammy Mackey.**

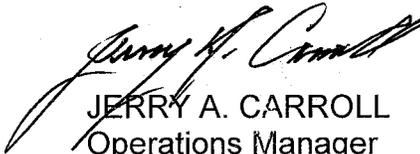

Prior to beginning work, please arrange a meeting with Ms. Ida Royer, 541-374-2541. You will need to provide a Project impact statement, job hazard analysis, copies of permits, and a personnel list. Please send electronic copies of these documents to Mr. Traylor, [Andrew.W.Traylor@usace.army.mil](mailto:Andrew.W.Traylor@usace.army.mil), Ms. Ida Royer, [Ida.M.Royer@usace.army.mil](mailto:Ida.M.Royer@usace.army.mil), and to Ms. Tammy Mackey, [Tammy.M.Mackey@usace.army.mil](mailto:Tammy.M.Mackey@usace.army.mil).

Please remain in contact with Ms. Royer throughout your time at the dam. There are many researchers and contractors working at the dam; please work to ensure good communication and cooperation between agencies and organizations.
