U.S. Army Corps of Engineers
Bonneville Lock and Dam
P.O. Box 150
Cascade Locks, OR 97014

Jennifer Gosselin
School of Aquatic and Fisheries Sciences
University of Washington
1325 Fourth Avenue, Suite 1515
Seattle, WA 98101

Dear Ms. Gosselin:

This is in response to your January 25, 2016 letter requesting approval for access to Bonneville Project's Smolt Monitoring Facility (SMF) in order to conduct research on fish condition of juvenile Chinook Salmon migrating through the Federal Columbia River Power System and relating these to their smolt-to-adult survival rates (SARs) and delayed mortality after hydrosystem passage. This research will occur from 26 March to 31 October, 2016.

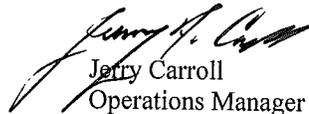

With respect to the work outlined above, your request is generally approved, provided you are able to obtain all necessary ESA and state permits. No work may begin until permits, or an explanation as to why permits are not required, are on file with Ms. Ida Royer and Ms. Tammy Mackey.

Prior to beginning work, please arrange a meeting with Ms. Ida Royer, 541-374-2541. Please remain in contact with Ms. Royer throughout your time at the dam. There are many researchers and contractors working at the dam, please work to ensure good communication and cooperation between agencies and organizations.

In addition to coordinating with Project Fisheries, you will also coordinate collection activities with SMF Personnel Rick Martinson, rickdm@gorge.net and Dean Ballinger, deanb@gorge.net.

A copy of this letter has been posted to NWP Research Access Responses found at <http://www.nwd-wc.usace.army.mil/tmt/documents/FPOM/2010/NWP%20Research/Research.html>. If you have questions regarding this correspondence, please contact Ms. Royer via e-mail or by phone.

Sincerely,

Jeffrey Carroll
Operations Manager
Bonneville Lock and Dam
