

Change Request Number: 11TDA010

Date: 30 November 2010

Proposed by: USACE Portland District - Tackley

Location of Change- 2.4.1.1, 2.4.1.2, 2.5.1.1, 2.5.1.2, 5.1.

Proposed Change (1):

2.4.1.1. December 1 through March 31 (Winter Maintenance Period)

f. December 1 through December 15, see 2.5.1.1.g and 2.5.1.1.h for Ice and Trash Sluiceway (ITS) operations for adult fallback and steelhead kelts.

g. December 16 through February 28 (or 29 in leap years), discontinue operation of the ITS on a 24 hour basis. Close endgate, and open sluice gates 1-1 and 17-3 to allow fish egress from the ITS when equalized with the forebay.

Comment [DB1]: Change not accepted. Leap year clarification not identified in FPP for other operations. Adding the clarification only here would cause confusion for other operations with the same date.

2.4.1.2. April 1 through November 30 (Fish Passage Season).

e. Open ice and trash sluiceway (ITS) gates 1-1, 1-2, and 1-3 over operating Main Unit-1, sluiceway gate 8-3 over Main Unit 8, 18-2, and 18-3 over operating Main Unit 18. If either of these main units is out of service, operate the next available main unit and associated gates adjacent to these units, (i.e. operate MU-2 w/gates if MU-1 is OOS, and operate MU-17 w/gates or MU-19 w/gates if MU-18 is OOS). The ice and trash sluiceway will be operated on a 24-hour basis April 1 through November. During periods when gates do not operate, set the top of the bottom end gate at elevation 142¹ to create an orifice plunge pool.

2.5. Adult Fish Passage Facilities.

2.5.1. Operating Criteria.

2.5.1.1. December 1 through February (Winter Maintenance Period).

g. December 1 through December 15, Open Ice and Trash Sluiceway (ITS) gates 1-2, and 1-3 over operating Main Unit-1, and gates 18-1 and 18-2 over operating Main Unit 18. If either of these main units is out of service, operate the next available main unit and associated gates adjacent to these units, (i.e. operate MU-2 w/gates if MU-1 is OOS, and operate MU-17 w/gates or MU-19 w/gates if MU-18 is OOS). The ice and trash sluiceway will be operated on a 24-hour basis December 1 through December 15¹.

h. December 16 through February 28 (or 29 in leap years), discontinue operation of the ITS on a 24 hour basis. Close endgate, and open sluice gates 1-1 and 18-3 to allow fish egress from the ITS when equalized with the forebay.

Comment [DB2]: Change not accepted. Leap year clarification not identified in FPP for other operations. Adding the clarification only here would cause confusion for other operations with the same date.

2.5.1.2. March 1 through November 30 (Fish Passage Season).

a. All Adult Facilities.

¹ This operation will be implemented on a trial basis and considered for longer term implementation pending review at the comprehensive check-in in 2013

9. March 1 through March 31, Open Ice and Trash Sluiceway (ITS) gates 1-2, and 1-3 over operating Main Unit-1, and gates 18-1 and 18-2 over operating Main Unit 18. If either of these main units is out of service, operate the next available main unit and associated gates adjacent to these units, (i.e. operate MU-2 w/gates if MU-1 is OOS, and operate MU-17 w/gates or MU-19 w/gates if MU-18 is OOS). The ice and trash sluiceway will be operated on a 24-hour basis March 1 through March 31².

Proposed Change (2):

5.1. Through the juvenile fish passage season, April 1 through November 30, and from March 1st through March 31 and December 1 through December 15 to aid adult steelhead fallbacks or kelt passage, either turbine unit 1 or unit 2 or both units will operate during daylight hours unless specially coordinated with FPOM. In order to provide favorable adult fish passage conditions while meeting transmission line needs, the main powerhouse turbine units will operate in the priority outlined in Table TDA-4 below.

*During fish passage season- Unit 1 and/or 2, Unit 3 or 4, Units under open sluice gates 1, ~~5, 8~~, 18

[†] During the March and December operation for adult steelhead fallbacks and kelt passage – Unit 1 and/or 2 and Unit 18 must be operated under at least 2 open sluice gates per unit

Reason for Change: To provide alternative passage route for overwintering adult steelhead fallbacks and kelt.

2.5.1.1.h- 18-3 has the automated hoist instead of the manual chaingates at 17-3.

Comments:

² This operation will be implemented on a trial basis and considered for longer term implementation pending review at the comprehensive check-in in 2013

NOAA Fisheries- Hold this one until we get a decision on winter ops. Also, if the changes do go through, some of the language here will need to be changed regarding unit 5 vs. unit 8 and regarding the number of units needed for a four vs. six gate operation.

Record of final action: ~~no~~No agreement ~~could be~~was reached ~~for~~at the ~~2010-January~~2010 FPP meeting, however, further discussions resulted in agreement by 28 February 2011 ~~winter season~~.
