

**Fish Passage Plan (FPP) Change Request Form**

---

**Change Form # & Title:** 16TDA003 – Water Temperatures  
**Date Submitted:** December 7, 2015  
**Project:** TDA  
**Requester Name, Agency:** Bob Cordie, The Dalles Fisheries  
**Final Action:** **APPROVED – December 17, 2015**

---

**FPP Section:** TDA 2.4.2. Adult Facilities – Fish Passage Season (March 1 – November 30).

**Justification for Change:** Temperatures are accurately measured 24 hours a day at each count station via data loggers. The pen stock was the old location to record temperature that proved to be very unreliable which is why we switched to the data loggers.

**Proposed Change:**

**2.4.2.2.** Water temperatures will be measured in count station of each adult fishway ~~and station service penstock~~. Temperatures will be recorded in the fishway status report. When water temperature reaches 70°F, all fish handling activities will be coordinated through FPOM prior to any action to verify protocols that will be followed.

**Comments:**

17-Dec-2015: FPOM is ok with this change but wants to make sure the underlying issue of temperature monitoring is addressed and improved.

**Record of Final Action:** APPROVED at FPOM meeting 12/17/2015
