Flood Control Summary at The Dalles, Oregon			
Apr-Aug, kaf	94700		
Apr-Aug %-Normal	101.7%	Upstream Storage Adjustment, kaf, Chart #2 (3) =	24264
Apr-Aug Change , kaf (1)	400	Initial Controlled Flow, ICF, kcfs, Chart #1 (3) =	356.8
May-Aug, kaf	80280	Estimated Unregulated Peak Discharge, kcfs, Chart #1-A (3) =	756.5

- Notes:**
- 1 Change in official forecast from the previous month.
 - 2 Normal Runoff Volumes based on 71-Year, 1929-1999, averages for MCDB, ARDB, LIB, DCDB, DWR as reported in the 2000 Level Modified Streamflow Report, 2004. Normal Runoff Volumes based on 30-Year, 1971-2000, averages for HGH, GCL, BRN, and TDA as determined by the Northwest River Forecast Center.
 - 3 Columbia River Treaty Flood Control Operating Plan, Corps of Engineers, Northwestern Division, 2003
 - 4 ARDB 15- and 30-Apr target elevations based on deviation request from BC Hydro. Refill space is not affected since target elevation for full operating pool has been temporarily raised to 1446.0 ft.
 - 5 See Columns 9 and 11 of next page for 15-Apr final shift elevations for DWR and GCL.

Questions? Contact Ken Soderlind, 503-808-3950; John McCoskery, 503-808-3951; or Patti Low, 503-808-3958.

Notes: Under certain conditions the required flood control space at DWR and BRN may be shifted to GCL prior to 30-April. The shifted rule curve shown above represents the maximum allowable flood control shift(s) for the current water year based on the current month's flood control requirements for each project and evacuation limitations at GCL; however, the actual volume shifted to GCL on any date is ultimately determined by the Bureau of Reclamation. The shift of volume for DWR to GCL has priority over the shift of volume from BRN to GCL in cases when GCL cannot accept the total combined volume.

- a** The potential flood control shift to GCL is limited to the operation at GCL above elevation 1252.3 ft (2744 kaf draft) at the end of February and elevation 1225.0 ft (4355 kaf draft) at end of March and 15-Apr, and also limited by the GCL maximum draft rate limit. All projects are to be at their non-shifted flood control requirements at the end of Apr.
- b** No shift is allowed, all projects to be back to their non-shifted flood control requirement by 30-April.
